

Elite Software Engineering Mentorship

12 Week Private Program

Ages 13–18

From **Zero Coding** Experience to Building **3 Real Projects** — Including an **AI-Powered** Web Application.

Schools Don't Teach Real Software Development

Most students

Consume technology

Scroll endlessly

Memorize theory

They don't

Build real apps

Understand how software works

Develop problem-solving skills

Universities expect students to already have experience. This program changes that.

What Your Child Will **Accomplish** in 12 Weeks

Learn Python and full-stack development

Build 3 real software projects

Create an AI-powered web application

Have a GitHub portfolio

Present their work on Demo Day

Understand how modern software is built

Program Overview

Duration: 12 weeks

Format: 1-on-1

Sessions: 24 online live lessons (60 minutes each)

Age group: 13-18

Student receives **personalized guidance and accountability.**

The 3 Real-World Projects

1 Personal Productivity Tracker

Student builds a task manager that saves data to disk.

Skills

Python

Loops

Functions

File storage

2 Smart Expense Manager

Students learn object-oriented programming and build a financial tracker.

Skills

OOP

Exception handling

Structured design

3 AI-Powered Study Planner Web App

Students build a full-stack app that generates study plans using AI.

Skills

Web development

Databases

APIs

AI Integration

3-Month Learning Journey

Month 1

Python Foundations + Project 1

Month 2

Object-Oriented Programming + Project 2

Month 3

Web Development + AI + Project 3 + Portfolio

Tools & Technologies

Python

Github

HTML / CSS / Javascript

SQLite

Flask

AI APIs

Students learn professional tools used by real engineers.

Why Private Mentorship?

Group classes move too fast or too slow.

1-on-1 means

Custom pace

**Individual
attention**

**Real
accountability**

**Direct
feedback**

**Faster
progress**

Who This Is For

Students age 13–18

No coding experience required

Complete beginners welcome

Students who feel bored with traditional school learning

Teens who spend a lot of time on phones, games, or computers

Students who struggle to stay motivated or consistent

Learners who prefer building things instead of memorizing theory

Students who haven't discovered their passion yet

Demo Day Presentation

At the end of the program, student presents:

Personal Productivity Tracker

Smart Expense Manager

AI-Powered Study Planner Web App

Portfolio Website

Parents are invited.

Your Mentor

- I'm Wajahat Hassan, a software engineer with over 6 years of professional development experience and a private mentor dedicated to helping students build real-world technical skills from the ground up.
- Over the years, I've worked with modern technologies including Python, full-stack web development frameworks, and AI tools, while also mentoring more than 500 students in structured, project-based learning.
- My approach emphasizes clarity, structured progression, and deep understanding — not memorization or shortcuts.
- Students I work with leave the program having built and deployed real software they genuinely understand and can confidently explain.

Program Investment

\$2400 total

12-Week Private Mentorship

24 Live 1-on-1 Sessions

Includes

AI-Powered Web App

Github Portfolio

3 Software Projects

Final Project Showcase

Limited Enrollment – 5 Students Per Cohort

Next Steps

1

Submit application

2

Schedule Parent Call

3

Confirm Enrollment
